PROFESSIONAL SUMMARY

Entry-level Technical Support Engineer with hands-on experience troubleshooting AWS infrastructure, Linux systems, and network protocols (DNS, TCP/IP, IP addressing). Skilled at diagnosing connectivity, hosting, and configuration issues, performing root-cause analysis, and clearly documenting resolutions. Strong multitasking ability, quick technical grasp, and comfort working in fast-paced, ticket-driven environments. Eager to apply strong troubleshooting fundamentals to support international customers with website, hosting, domain, and email issues, while learning new tools and platforms quickly.

SKILLS

- Technical Support: Issue Troubleshooting, Root Cause Analysis, Ticket Documentation, Escalation Handling, Cross-Team Collaboration
- Networking & Protocols: DNS, TCP/IP, HTTP/S, IP Addressing, ping, tracer, ipconfig, Subnets, Security Groups, Load Balancing
- Systems & Scripting: Linux (Ubuntu/CentOS/Fedora) Administration, Bash Scripting, SSH, Nginx, File & Process Management
- Cloud & Hosting Infrastructure: AWS – EC2, S3, IAM, VPC, CloudFront, RDS, Lambda, ALB, CloudWatch, NAT Gateway
- DevOps & Automation: CI/CD Pipelines, GitHub Actions, Docker, Terraform (Basic), Automation
- Version Control & Communication: Git, GitHub, GitLab, clear written and verbal technical communication

EXPERIENCE

Cloud Computing Intern — Infrastructure & Technical Support | Rooman Technologies *4 Months*

- Diagnosed and resolved infrastructure and connectivity issues across AWS services (EC2, S3, VPC, IAM, RDS, CloudFront), maintaining uptime, scalability, and security
- Applied networking fundamentals — DNS, subnet configuration, security groups, NACLs, route tables, and NAT/Internet Gateway — to troubleshoot and resolve access and routing issues
- Administered Linux (Ubuntu) systems, resolving user access, file permission, and process issues, and managing services via systemctl
- Monitored and troubleshot CI/CD pipeline failures in GitHub Actions, reducing manual deployment steps by 100% through automation
- Documented recurring issues and resolutions to support faster future troubleshooting and knowledge sharing

PROJECTS

AWS Two-Tier Production Architecture

- Deployed and supported a highly available 2-tier AWS architecture across 2 Availability Zones using custom VPC, public/private subnets, Internet Gateway, and NAT Gateway
- Diagnosed and validated Application Load Balancer (ALB) failover across 2 EC2 (nginx) instances, achieving zero-downtime traffic rerouting on health check failure
- Supported RDS MySQL in a private subnet with layered security groups, maintained Bastion Host for secure SSH access, and monitored CloudWatch alarms for CPU and host health

Technologies: AWS VPC | EC2 | RDS MySQL | ALB | NAT Gateway | Bastion Host | Security Groups | CloudWatch | Linux | Nginx

CloudDrive — 3-Tier Cloud Storage Application on AWS

- Supported and troubleshot a 3-tier cloud storage platform using EC2 for compute, RDS MySQL for data persistence, and S3 for secure object storage with pre-signed URL access
- Maintained ALB with CloudFront CDN and HTTPS, resolving connectivity and latency issues across the layered architecture (Internet → ALB → EC2 → RDS)
- Audited least-privilege access using IAM roles and VPC security groups, eliminating hardcoded credentials

Technologies: AWS EC2 | S3 | RDS MySQL | VPC | ALB | CloudFront | IAM | Security Groups | VPC Endpoint | Node.js | REST APIs

AWS Static Web Hosting — S3 + CloudFront

- Deployed and supported a highly available static website on S3 with CloudFront CDN, resolving DNS, caching, and HTTPS configuration issues via AWS Certificate Manager (ACM)
- Configured and troubleshooted CloudFront Origin Access Control (OAC) and S3 bucket policies to resolve public-access issues, routing all traffic through CloudFront
- Enabled S3 Versioning for fast recovery from accidental deletions and configured edge caching to optimize global performance

Technologies: AWS S3 | CloudFront | ACM | IAM | OAC | Bucket Policies | Static Hosting

EDUCATION

S.G. Balekundri Institute of Technology — Belgaum

2026

Bachelor of Engineering in Computer Science

Relevant Coursework: Cloud Computing, Networking, Operating Systems, Web Technologies

Motichand Lengade Bhartesh Polytechnic — Belgaum

2023

Diploma in Computer Science

Relevant Coursework: Programming, Database Management, Computer Networks, Web Development

CERTIFICATIONS & TRAINING

- AWS Cloud Practitioner Essentials — Amazon Web Services (AWS Skill Builder) | 2025
- AWS EC2, S3 & Lambda Fundamentals — Amazon Web Services (AWS Skill Builder) | 2025
- AWS Educate Getting Started with Compute — [Training Badge](#)
- AWS Educate Getting Started with Storage — [Training Badge](#)
- AWS Educate Getting Started with Networking — [Training Badge](#)
